

Company introduction

Tab Systems Inc. specializes in the development and production of multimodal biometric systems for identification, access control, time & attendance and building automation. We develop and manufacture **smarti**[®] - a complete access control and time & attendance solution based on multimodal biometrics using face and voice recognition.

Multiple functions, high reliability, adaptability and unlimited connectivity mean it can be used in business/corporate environments, high security environments, building automation...

An additional advantage of this great product is the integration of multiple additional features (video intercom, video & IP phone, video messaging, video surveillance...) into one compact device for a reasonable price. **smarti**[®] is also completely protocol independent and can therefore be used to control almost any kind of I/O device (electronic locks, lights, alarm systems, finger print scanners, magnetic card readers...). Designed with flexibility in mind, **smarti**[®] can be used for many applications within: business/corporate and high security environments, for home/building automation etc.

In October 2008 the new **smarti**[®] DIADEM unit was nominated to be one of only four finalists in the "Access control" category for the Scandinavian Detektor International Award. This is presumably the only internationally established product prize that is solely nominated and evaluated by a panel of experts made up of security journalists.

In August 2008 the DIADEM unit was also nominated to be one of six finalists in the category "Security Innovation of the Year" at the Security Excellence Awards 2008. These awards are organized by Security Management Today, Security Installer and info4security and are acknowledged as the "Oscars" of the security world!

smarti[®] was also nominated three times in a row, in the years 2006, 2007 and 2008, by the BSIA (British Security Industry Association) among six best products in the world in the "Best new access control product" category. Among other finalists where companies like Panasonic, Siemens, Honeywell... In the years 2006 and 2007 it also got an award from the Slovenian Chamber of commerce for "Best innovation".

Tab Systems Inc. market **smarti**[®] in more than 20 countries around the globe. And the system is translated into eleven languages: English, German, French, Slovenian, Croatian Dutch, Italian, Spanish, Polish, Russian and Arabic.
