

Innovative multimodal biometric system for controlling access and presence

TAB Systems has rolled out smarti®, an integrated system for recognizing people by using multimodal biometric parameters. It has been designed and made for different uses. It is used for access control, person presence tracking,

time & attendance, controlling various devices, and appliances, etc.,

and also for sending and receiving video messages, for video surveillance, and for video intercom. The system provides high level of security based on face/mimic recognition and voice recognition. Based on previously saved biometric data, system recognizes persons and acts accordingly (creates an event with a photo of a person, opens a door, turns on a light, sends an e-mail or SMS, etc.).

Energy efficient display system for quality images

Pelco has released 700 Series DLP™, a new video display system. It is designed for the needs of the video security industry. A 50" rear projecting display utilizing DLP (Digital Light Processing)

technology -- a trademark of Texas Instruments -- the series pro-

vides superior image quality, with zero burn-in over its entire 11-year, 100,000-hour life cycle. At only 18" deep, a single 50" display delivers the viewing area equivalent to that of twenty-six, 9" CRT monitors, yet consumes only 80 percent of the power and 20 percent of the physical space. It even uses 30 percent less power than plasma displays.

Affordable entry-level card printer featuring convenience and simplicity

Fargo Electronics has released Persona C30, a new card printer. It is designed for organizations such as K-12 schools, small

corporations, clubs or recreation facilities that need high-quality plastic ID cards without high-security features. The printer has

been designed with customer convenience in mind. An easy-loading, all-in-one ribbon cartridge saves time and eliminates the mess and expense of torn, wasted ribbons. In addition, a card cleaning roller is integrated into the ribbon cartridge to assure clean card stock and high-quality prints.
