ShangHai ChengFeng Digital High-tech Co.,Ltd (1/19/2007)

Company Introduction

TAB Systems specialize in applications for personal identification and process automation, based on multimodal biometric recognition. smartIR is a complete access control and time & attendance solution based on multimodal biometrics using face/mimic and voice recognition.

The main advantage of this great product is the integration of multiple additional features like video messaging, video intercom, video surveillance and video/IP phone into one compact device for a reasonable price. smartIR is also completely protocol independent and can therefore be used to control almost any kind of I/O device (electronic locks, lights, alarm systems, finger print scanners, magnetic card readers...).

solutions in today's market," says Jason Halverson, principal analyst with Frost & Sullivan of Palo Alto, Calif. "Nextiva's built-in video analytic.....▶Detail
