**TAB Systems faces up to biometrics**

Written by Neil Sutton

Thursday, 31 January 2008

TAB Systems Inc. has launched a new smart unit called Diadem. Smarti is a complete solution for access control, time and attendance, and building automation. smarti identifies people by who they are (face and voice recognition) and not by what ID card or key they carry. Multiple additional functions, high reliability and unlimited connectivity mean that smarti can be used in corporate environments, high security environments and for building automation.

The new Diadem unit is fanless for quiet operation. It has an aluminium front casing which is IP 65 compliant and is meant for indoor and outdoor use. It is in-wall or on-wall mountable. The inbuilt IR CCTV camera and IR LED lights provide highly reliable identification in all lighting conditions. The unit is also equipped with an 8-inch colour touch screen, motion detector, microphone, speakers, Intel Centrino processor, built in storage and internal memory. The integrated communication ports and relay I/O controller can be used to control lights, electronic locks, alarms, sensors and other electrical devices.
