TAB Systems

24 Jan 2008

TAB Systems Inc. Releases a New Smarti® Unit

TAB Systems Inc. will present a new smarti® unit called Diadem at IFSEC 2008.

smarti® is a complete solution for access control, time and attendance and building automation. smarti® identifies people by who they are (face and voice recognition) and not by what ID card or key they carry. Multiple additional functions, high reliability and unlimited connectivity mean that smarti® can be used in corporate environments, high security environments and for building automation.

The new Diadem unit is fan-less for quiet operation. It has an aluminium front casing which is IP 65 compliant and is meant for indoor and outdoor use. It is in-wall or on-wall mountable. The inbuilt IR CCTV camera and IR LED lights provide highly reliable identification in all lighting conditions. The unit is also equipped with an 8" colour touch screen, motion detector, microphone, speakers, Intel Centrino processor, built in storage and internal memory. The integrated communication ports and relay I/O controller can be used to control lights, electronic locks, alarms, sensors and other electrical devices.

SEARCH GO

Product: VPIR37Ce

The VPIR37Ce from Vista is an improved colour PIR covert camera available with a 1/3-inch CCD and enhanced sensitivity.
