**Key Specifications / Special Features**

smarti is a complete solution for access control, time and attendance, and building automation. smarti identifies people by who they are (face and voice recognition) and not by what ID card or key they carry. Multiple additional functions, high reliability and unlimited connect ability mean that smarti can be used in corporate environments, high security environments and for building automation. The Diadem unit is fanless for quiet operation. It has an aluminium front casing which is IP 65 compliant and is meant for indoor and outdoor use. It is in-wall or on-wall mountable. The built-in IR camera with LED lights provides highly reliable identification in all lighting conditions. The unit is also equipped with an 8-inch color touch screen, motion detector, microphone, speakers, Intel Centrino processor, built in storage and internal memory. The integrated communication ports and relay I/O controller can be used to control lights, electronic locks, alarms, sensors and other electrical devices.
