

# The nominations for the Detektor International Award are made

Stockholm, Sweden

**At the recent Skydd-exhibition in Stockholm, the nominees for the 2008 Detektor International Awards were presented to the banquet dinner audience of over 900 professionals from the security industry.**

The banquet during the Skydd-exhibition had a record attendance of more than 900 guests, a significant number not only in a Swedish or Nordic perspective. Lennart Alexandrie, editor-in-chief for Detektor and managing director for the security publishing company AR Media, named the event as the security world's largest prize nomination dinner.

The Awards-final will be held in connection with Sectech Copenhagens first exhibition day (19-20 Nov), during the evening's banquet dinner. The winners in the categories - Access Control, Alarm&Detection and CCTV will be unveiled during the dinner. A custom-designed glass sculpture from the world renown glass sculptor Bertil Vallien will be given to the winner in each of the categories.

The Detektor International Award is presumably the only internationally established product prize that the security suppliers can't nominate products to.

#### **Nominees in the Access Control category:**

- **iLoq**, an electronic locking system from the Finish company iLoq.
- **RKL55**, a smart card reader from HID.
- **RF30EM**, a wireless reader for the access control system Bewator Entro V.6.0 from Siemens Building Technology - Security Product Division.
- **Diadem**, a biometric reader that combines facial recognition and speech recognition from the Slovene company TAB Systems.

#### **Nominees in the Alarm & Detection category:**

- **Hemi-Directional Loudspeaker**, a loudspeaker solution made primarily for voice alarm from Bosch Security Systems.
- **Galaxy Dimension**, an intruder alarm panel with full access control functionality from Honeywell.
- **T5000**, a detection camera from ThruVision.

#### **Nominees in the CCTV category:**

- **Axis P3301**, a network camera from Axis Communications.
- **IVA 3.5**, a solution for intelligent video from Bosch Security Systems.
- **NSR-1000 series**, a network surveillance server from Sony.
- **Q22**, a network camera with 360 degree surveillance from Mobotix.
