Integration plus comprises security application software modules which address specific security issues, whilst collectively providing what the firm calls a global integrated security solution. 'It will provide system integrators with a powerful tool to ensure clients maximise on every element of their security systems,' said Lee Copland, MD of MAXCESS Systems EMEA.

The awards finalists include, in the best new access control product, for the fourth time, a smarti unit. Protocol independent, it can be used to control almost any kind of electronic device the makers add such as sensors, electronic locks, lights, alarm systems, fingerprint scanners and RFID readers. This year Slovenian manufacturers **TAB Systems** Inc launched a new biometric unit for access

National Security Inspectorate (NSI) staff will be on hand to provide details of the inspectorate's third-party certification schemes for electronic security systems and manned guarding companies. NSI are a sponsor of the Apprentice Skills Challenge, offering their support to this event for the tenth year running. NSI was the first SIA-accredited assessing body to offer access to the Approved Contractor Scheme (ACS) via the Passport route. NSI approved

IDL are launching a new version of the Fastlane Glassgate. As in previous years the Fastlane range of entrance control will also be demonstrated.

B127
stand

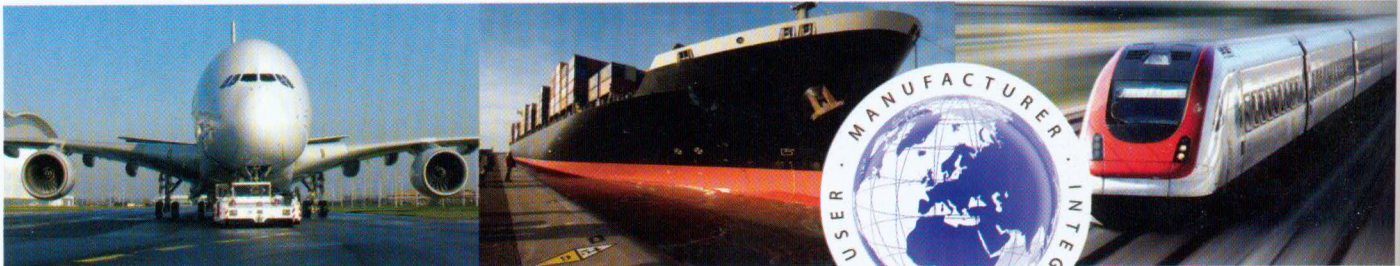

The new version can be supplied with a range of glass panel heights up to 1.8m, the makers' first full height turnstile. The friction brake force has been increased to provide a more secure closed position for the glass panels. For optimum security, standard width dual glass barrier lanes can be provided. The new

enclosure has been re-designed with no side panels to give a more open feeling that complements the glass barriers.
