TAB Systems Inc. develops and manufactures smarti. smarti combines multimodal biometric access control based on facial and voice recognition with a myriad of other features that makes it an easy choice for users across a wide range of categories. It includes modules for access control, time and attendance, building automation, video intercom and IP phone, video surveillance and messaging, saving you money as you do not need to buy additional systems for these features. This allows you to learn one system for a wide variety of client needs.
