

## Smarti listed as IFSEC-finalist

Birmingham. UK

**With smarti Electra winning the IFSEC 2009 award in the access control category, TAB Systems announces that smarti Guardeon is one of the six finalists at the IFSEC Security Industry Awards this year. This makes the fifth year in a row that the smarti family of products has been short listed as one of the best new access control products.**

TAB Systems Inc. is planning the official worldwide launch of a new biometric unit for access control, time & attendance and building automation called smarti Guardeon at IFSEC 2010. The new unit combines multimodal biometric access control based on facial and voice recognition with MIFARE, RFID, slim design, low power consumption and a myriad of other features.

Widely regarded as the industry's premier event, the IFSEC Security Industry Awards is both a celebration and an acknowledgement of excellence of the products and technological innovations influencing and shaping the industry and security best practice.
